

Diabetic Foot Ulcers

Curriculum Overview

Designed for:

- High school students
- Post-secondary courses in health care
- Certified Nursing Assistant training courses
- Public health organizations
- Community education

Length:

The activities in this curriculum will last approximately 1 hour. With supplemental materials, this curriculum can be adapted to a longer block of time.

Goal:

To help participants learn about the contributing factors, location and assessment of diabetic foot ulcers.

Synopsis:

This curriculum helps participants learn about the impact of diabetic foot ulcers. The model and curriculum help develop awareness of patient focused care and locate common areas of the foot. The curriculum gives participants a pre-test to check their knowledge and understanding of diabetic foot ulcers. The lessons use a slide presentation and integrates the simulation experience into the lesson.

Curriculum Components:

- Teacher's guide - Complete lesson, including detailed steps of activities, time and materials needed, student handouts and instructor information to teach the lesson
- Student materials
- Assessment tools
- PowerPoint presentation slides

Learning Objectives:

Lesson 1: Diabetic Foot Ulcers

- Identify contributing factors to Diabetic Foot Ulcers
- Locate areas subject to Diabetic Foot Ulcers
- Perform the steps in accurately assessing a Diabetic Foot Ulcer
- Explain how to document Diabetic Foot Ulcers
