

Introduction to Intramuscular Injections

Curriculum Overview

Designed for:

- High school students
- Post-secondary students in health occupations courses
- Certified Nursing Assistant (CNA) training courses

Length:

The activities in this curriculum will last approximately 1 to 1 ½ hours. With supplemental materials, this curriculum can be adapted to a longer block of time.

Goal:

To help participants learn about medication administration through the intramuscular route.

Synopsis:

This curriculum helps participants learn about medication administration through intramuscular routes. The lesson begins with activities that students may complete before the content is presented. Educators have a choice to review anatomy (identifying layers of the skin) and/or an empathy activity focusing on patient-centered care to teach important nursing soft skills. The lesson uses a slide presentation and integrates the intramuscular injection trainer to learn the proper procedure and documentation surrounding it. A brief quiz is included for assessment.

Curriculum Components:

- Teacher's guide - Complete lesson, including detailed steps of activities, time and materials needed, student handouts and instructor information to teach the lesson
- Student materials
- Assessment tools
- PowerPoint presentation slides

Learning Objectives:

- Identify guidelines for safe medication administration
- Discuss indications for the intramuscular route
- Identify locations for intramuscular injections
- Demonstrate intramuscular injection technique
- Explain how to document an intramuscular injection
